- EP iLogic is one of projects in EP Office.
- Currently Projects in office.
 - EP iLogic Viewer
 - EP iLogic CAD
 - Middle-ware (Under Testing / Demo)
 - Arduino / Raspberry Pi

Region / Signify / Extract Title →
ePenguin Office

What is iLogic CAD ?

- Building Config & loop diagram.
- It owns LCOD Technology to implement Module Design/Control Diagram.
- Monitor form Middle-ware.
- Controller for Middle-ware (None under DEMO).
- Supporting *.ilg project file.
- Supporting *.ilgt template file for module design.

Who uses CAD properly ?

- Application Engineer
- Firmware Tester
- System Monitor
- System Integrate / Mechanical Engineering

Controller / Configuration / Connective /
Communication (auto point mapping)

What is iLogic Viewer ?

- It is viewer for project that user uses.
 - Monitor functionality.
 - Control output (None in DEMO).
 - Fixed View & Layer Ack.
 - Program provide 30 days to DEMO
 - Load *.ilg files
 - Display config diagram from CAD.
-
-

Who use Viewer properly ?

- Firmware Tester
- Demo Program Structure
- Monitor
- Operator (None under Demo)
- Distribute project

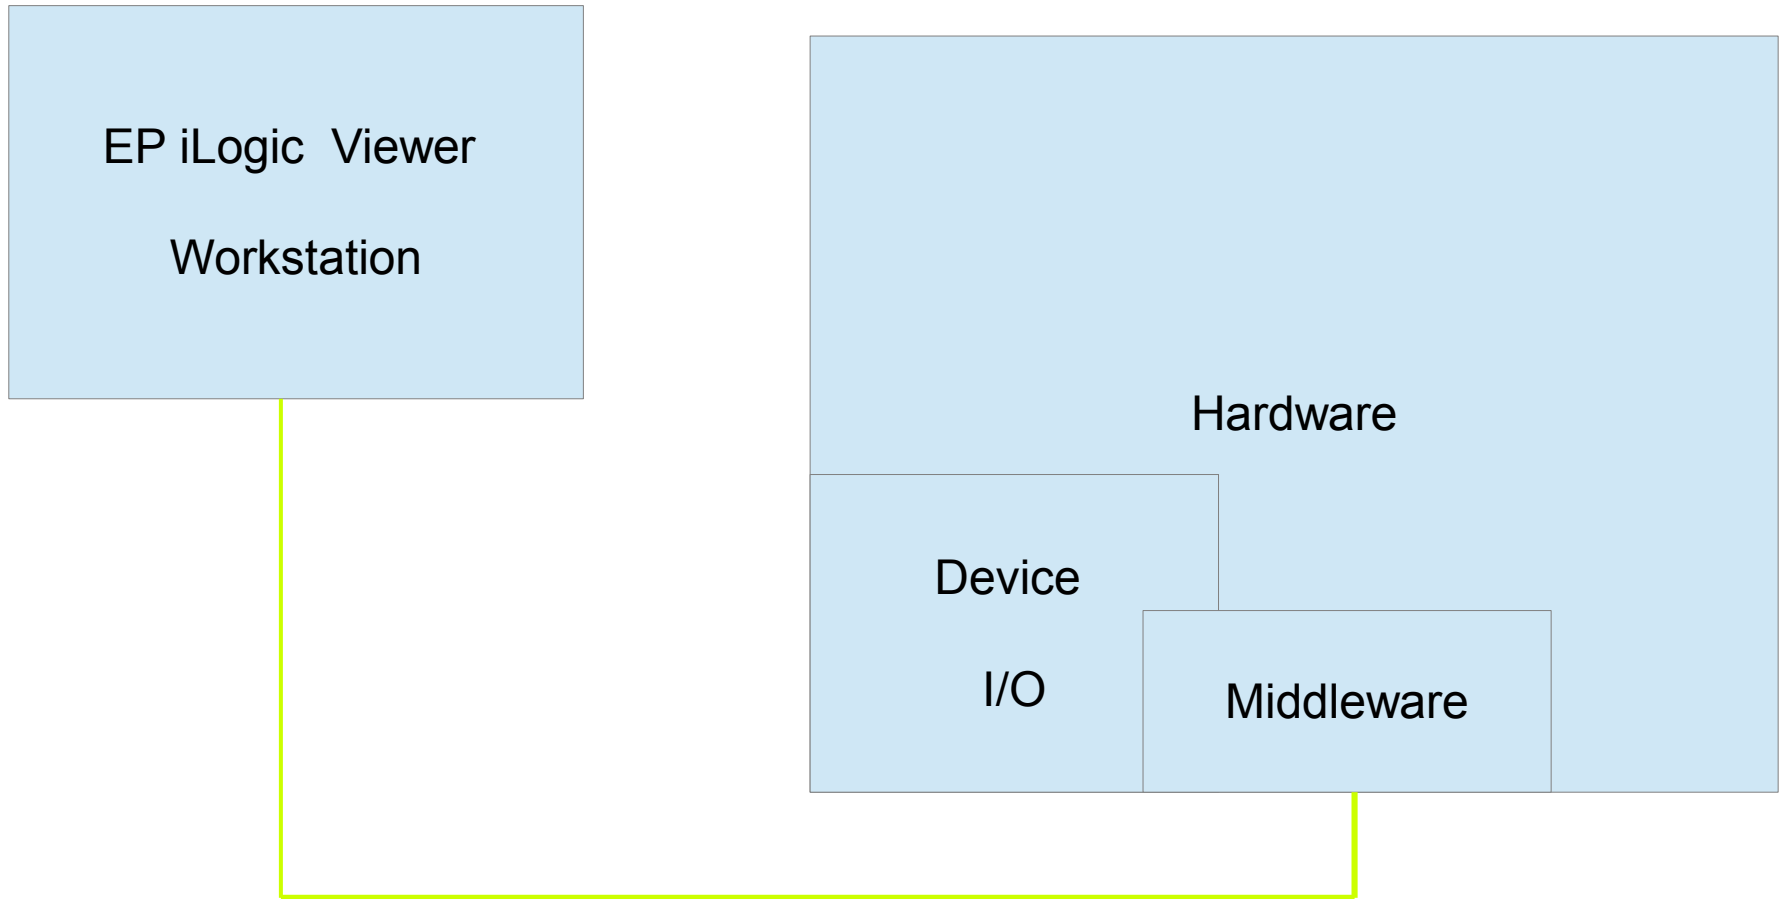

Version Control

- 0.1.X → 1.X Personal Edition
- 0.2.X → 2.X Standard Edition
- 0.3.X → 3.X epOffice to applicate
- 0.4+.X → 4+.X Projects of Institute of Machine

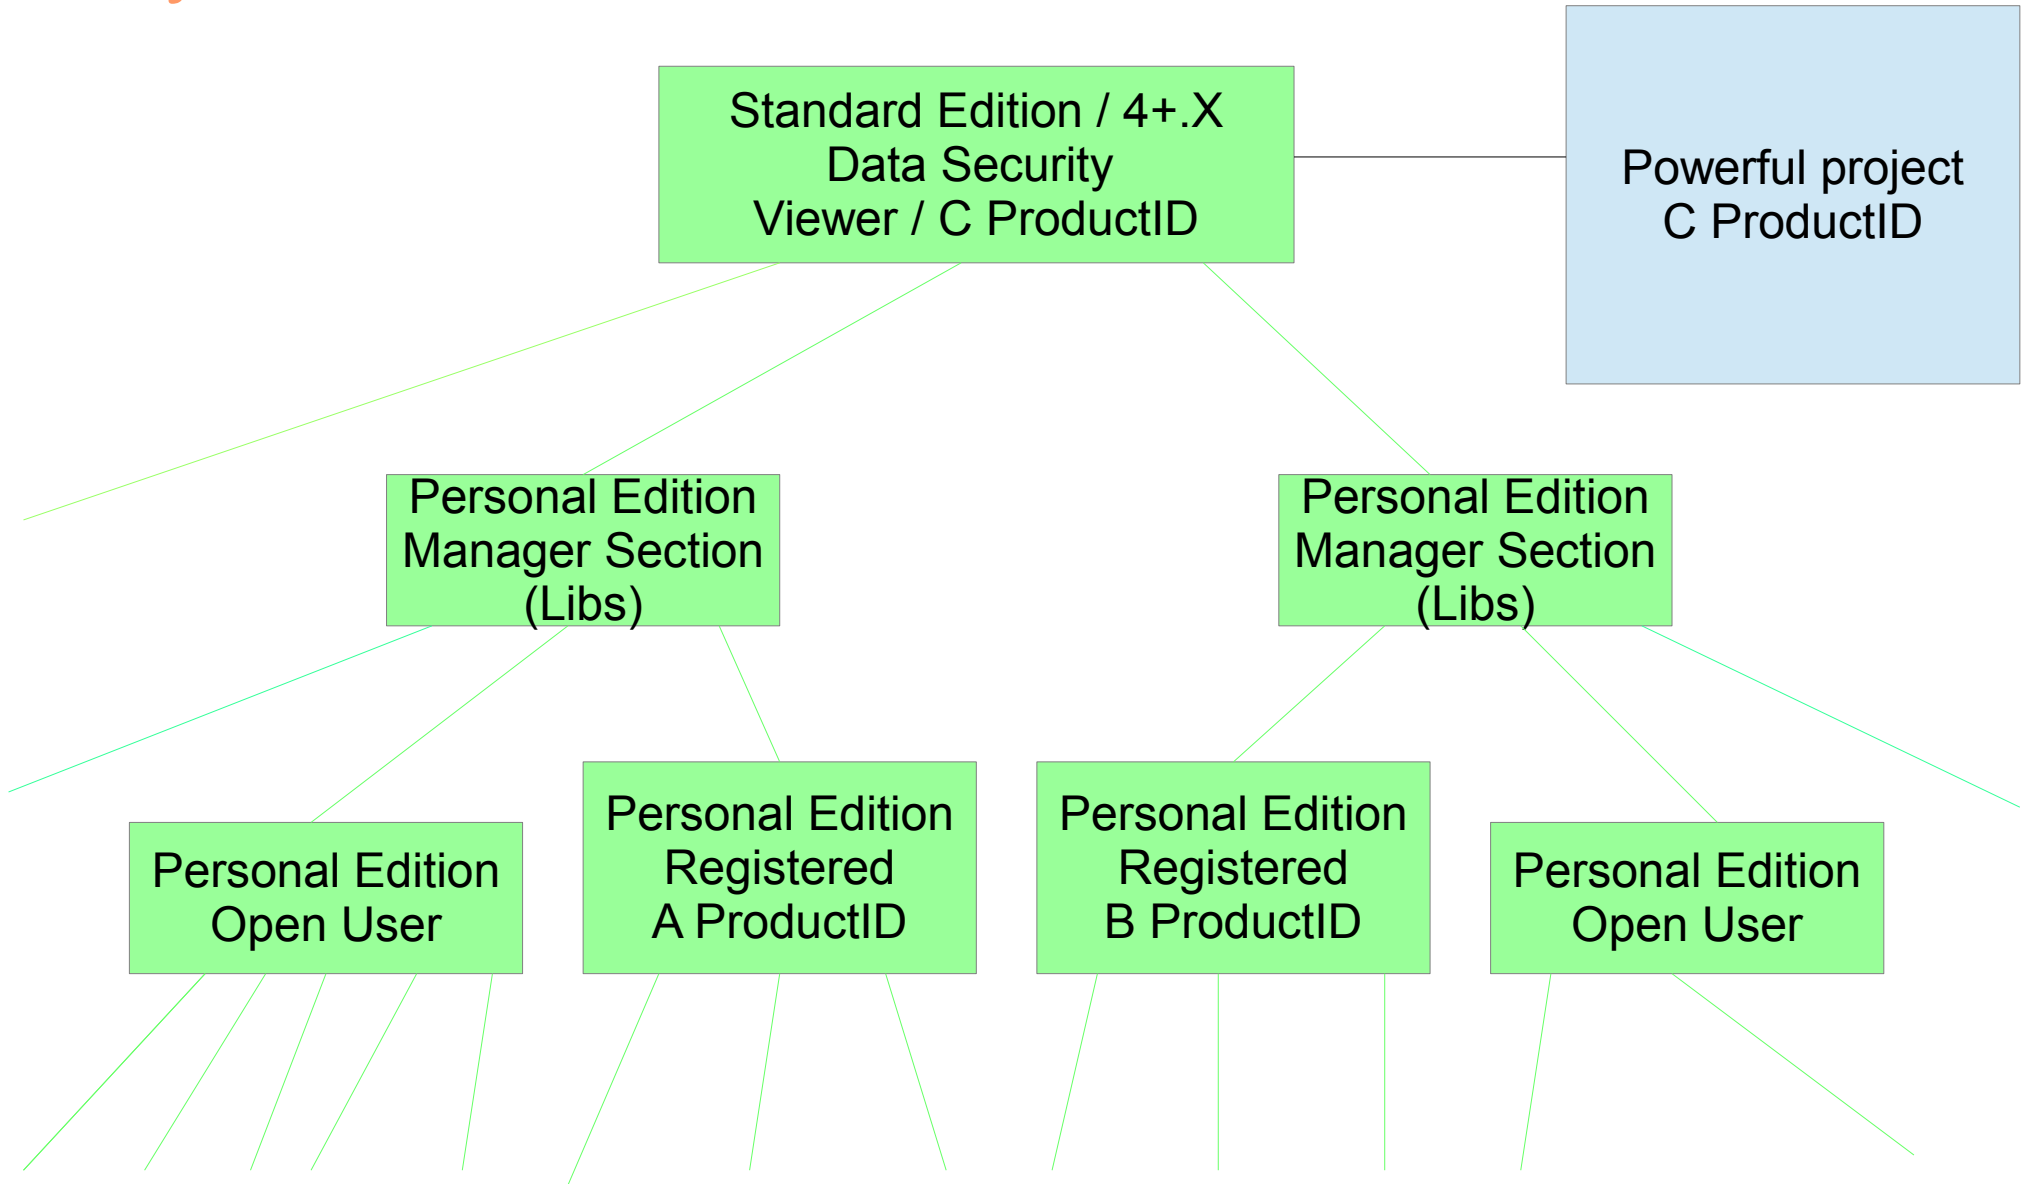

0.X.X beta version for testing and evaluation.

What are Middlewares ?

Why use Standard Edition / 4+.X ?

What is WEO_User @ Machine_Name ?

- They are Evaluated Opening User limited at Workstation.
 - Program provide 30 days for evaluation and testing.
 - This user can apply for evaluated registration.
(ProductID --- ^ACCENTROPY)
 - The admin of workstation can setup e-mail server for group team and windows terminal.
-
-

How to apply for 4+.X registration ?

- Not limited this URL - `epenguin-reg.blogspot.org`
- You must have an e-mail.
